PROFILE

Result-oriented Software Engineer with 3+ years of experience building **internal enterprise systems** and **automating operational workflows** in high-stakes financial environments – Citigroup

AWS Certified Solutions Architect with strong expertise in **Java/JVM backend development**, cloud infrastructure, and complex system integrations (ERP, data warehouse, database migration).

Conducting active research in **LLM Inference Routing and AI Agents** at Monash University. Passionate about driving **operational efficiency** through CI/CD best practices and clean code engineering.

EDUCATION & QUALIFICATIONS

Monash University – Master of Information technology (HD) 2024-2026

Research Proposal: Efficient Routing of Inference Requests across LLM Instances in Cloud-Edge Computing

Key Coursework include: Cloud Computing & Security (Docker, Kubernetes, AWS)

University of Bristol – Bachelor of Computer Science Second class (Upper) 2018-2021

WORK EXPERIENCE

Tech Analyst | CITI group (Focus: Internal Tooling, System Integration) **Jul 2021 to Jun 2024**

- **Operational Efficiency & Automation:** Engineered Python-based automation tools for End User Computing to mitigate operational risk. Recognized as a **Best Practice** during the annual Citi Risk knowledge-sharing, significantly reducing manual intervention.
- **Internal API Development & Integration:** Designed and deployed **RESTful APIs** to integrate Time Tracking systems with Jira, **reducing administrative overhead by 80%**. Maintained full CI/CD pipelines (Jenkins, TeamCity) with quality gates (SonarQube, Black Duck).
- **Enterprise Data & ERP Integration:** Enhanced mission-critical data pipelines for the FRTB program using **JDBC, Oracle, and Spark**. Implemented modern Spark-based reporting to replace legacy systems.
- **Database Migration:** Spearheaded complex database migration from **Sybase to Oracle**, ensuring 100% data integrity for critical financial records.
- **Global Collaboration:** Collaborated with cross-functional global teams to sustain the Credit Risk Trade Sensitive Matching system, ensuring high availability and regulatory compliance.

VOLUNTEER EXPERIENCE

Ward Ambassador/Reception | Victoria Heart Hospital **Dec 2024 to July 2025**

Peer Mentor & Disability Peer Mentor | Monash University **Jan 2025 to Jun 2025**

SKILLS

Coding: Java/JVM (Expert), Python, SQL, Go, Bash. *Kotlin (actively learning).* **Cloud & Infrastructure: AWS Certified Solutions Architect (Associate)**, Docker, Kubernetes, CI/CD (Jenkins, TeamCity), Linux. **Backend & Integration:** RESTful API Design, Microservices, JDBC, Oracle, Spark, Redis, Maven/Gradle. **AI:** LLM Inference Routing (Active Research), AI Agent Development, Claude Code, Cursor, Copilot, Gemini API. **Engineering Practice:** Clean Code, SonarQube, Black Duck (Vulnerability Scanning), Agile/Scrum, Git, Jira, Confluence. **Languages:** English (PTE 79), Mandarin (Native), Japanese.
